## What content are we looking for?

- Strictly no (product) marketing
- Diverse technology topics (not 5 talks about technology X)
- Non-technical perspectives (policies, politics, management, ...)

## Diversify Content

- We try to keep the conference technical
- However, sometimes we need to look over the edge
- 1 diversity talk, travel & accommodation provided by DENOG
- 2 talks about sustainability
- Please give us Feedback on other topics that are important to you!

## Why **Workshops**?

- We discourage marketing talks and product presentations for the conference
- However hearing from vendors is still relevant to many of you
- Workshops offer a place to dive deeply into technology and to get hands on experience
- Workshops are opt in rather than single stage
- We do not record & stream to encourage participation and questions
